

Our Classroom News

Week of: May 2-6

What Happened This Week:

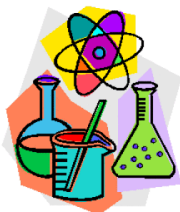

- Oobleck: Solid or liquid?
- Ice Cream
- Self-Esteem

A Peek At What We Are Learning

Presentations will begin Monday, May 9. I would encourage you to run through your student's presentation with them so they are prepared.

Students observed Oobleck and created an explanation about whether Oobleck is a solid or a liquid. Students also studied phase changes by making some delicious ice cream.

A HUGE thank you to everyone who brought items. I sincerely appreciate it.

Challenge: Ask your student how ice cream demonstrates phase changes and the states of matter.
